

Bug Report

Defect Summary	Profile Picture Upload Failure
Component	Profile Management
Affected Version	v2.1.4
Severity	Critical (A)
Priority	High
Assignee	Rashmi Dulanga
Description	When users try to upload a profile picture, the application either crashes, displays error messages, or hangs indefinitely during the upload process. This issue prevents users from successfully updating their profile pictures, significantly impacting their overall user experience.
Steps to Reproduce	<ol style="list-style-type: none">1. Go to the User Profile section.2. Click on the "Upload Profile Picture" button.3. Choose an image file from your device in the file picker.4. Click "Open" to start the upload.5. Watch the application's behavior during the upload process.6. Check if the profile picture appears as a preview.7. Look for any error messages or upload issues.8. Wait for the upload to finish and confirm that the new profile picture is displayed.9. Refresh the page to ensure the profile picture is still updated.
Expected Result	The image should upload successfully, and the new profile picture should be displayed immediately after the upload is complete. The application should function smoothly without crashing or hanging.
Actual Result	The upload process either causes the application to crash, displays an error message, or hangs indefinitely, preventing the profile picture from being updated.
